

## **Auxiliary Aids and Services Workshop**

### **Case Study 2**

A student with limited upper body movement is registered on a Maths Degree. Consider what auxiliary aids and services could be offered to him to enable him to fully participate in lectures, tutorials and examinations.

- What logistical or practical issues might influence the decision of what auxiliary aids or services could be provided?
- How might accounting or financial issues influence the choice of auxiliary aid or service?
- What human issues should be considered when making the decision of what auxiliary aids or services to provide?
